HTML and CSS _ATL Access information to be informed and inform others.

Ishita Bhattacharjee

Classwork 9/21 Students Wednesday at 11:35 AM

IB MYP IB MYP Design - Ms Ishitha (MYP4)

Task Details

You have already explored basic HTML in MYP 2. Now, it is time to revisit what you know, discover how CSS improves the appearance of a webpage, and prepare for our upcoming website development challenge.

Your goal is to explore, experiment, test your ideas, and learn from your mistakes.

CRITERION: C — CREATING THE SOLUTION

PART 1: QUICK CHALLENGE — CAN YOU CRACK THE CODE?

Look at the code below.

```
<h1>Hello Designers!</h1>

<p>Welcome to my website.</p>
```

Think about the following questions:

1. What do you think will appear on the webpage?
2. Which HTML tag creates a heading?
3. If you could change one thing about this webpage, what would you change?

Share your responses on our class Padlet.

Padlet: https://padlet.com/ishitab2/my-harmonious-padlet-s024gpdqctcgy7tf68x2

PART 2: REVISIT HTML AND CSS

Read the attached document titled “MYP 4 HTML & CSS Quick Revision Guide” before our next Design lesson.

As you read, identify:

- Two HTML tags you remember using.
- One HTML concept you had forgotten.
- One CSS property you would like to try.
- One question you have about creating websites.

PART 3: EXPLORE AND EXPERIMENT

ATL SUB-STRAND — RESEARCH SKILLS

Access information to be informed and inform others.

Apply this skill by identifying useful information in the revision guide and explaining how HTML and CSS contribute to website development.

Use the resources below to refresh your understanding of HTML and CSS.

HTML TUTORIAL

https://www.w3schools.com/html/

CSS TUTORIAL

https://www.w3schools.com/css/

TRY IT YOURSELF

https://www.w3schools.com/html/tryit.asp?filename=tryhtml_default

ADDITIONAL LEARNING RESOURCES

HTML — MDN Web Docs

https://developer.mozilla.org/en-US/docs/Learn_web_development/Getting_started/Your_first_website/Creating_the_content

CSS — MDN Web Docs

https://developer.mozilla.org/en-US/docs/Learn_web_development/Core/Styling_basics/Getting_started

While exploring, change the code, run it, observe the results, and try to understand how your changes affect the webpage.

PART 4: GET READY FOR VS CODE

In our upcoming lessons, we will explore Visual Studio Code (VS Code) to create and develop webpages.

Familiarise yourself with the following resources:

Download VS Code:

https://code.visualstudio.com/download

Install VS Code on Windows:

https://code.visualstudio.com/docs/setup/windows

Getting Started with VS Code:

https://code.visualstudio.com/docs/getstarted/overview

Editor Tutorial:

https://code.visualstudio.com/docs/editing/getting-started/editor-tutorial

Previewing Your Webpage:

https://code.visualstudio.com/docs/editing/preview

You do not need to install VS Code unless instructed. For now, focus on understanding the basics of HTML and CSS.

PART 5: LOOKING AHEAD — DIGITAL IDENTITY WEBPAGE

In class, you will take on a design challenge: create a simple webpage that introduces you.

Your webpage should include:

1. A main heading with your name or a creative title.
2. A short introduction about yourself.
3. A subheading and a list of at least three interests.
4. A background color to improve the appearance of the website
5. One creative addition, such as an image, a hyperlink, a bordered section, or a styled button.

Use the W3Schools Tryit Editor to experiment with your ideas.

Remember to test your webpage and improve at least one design choice after observing the result.

SUCCESS CRITERIA

By the end of this inquiry, you should be able to:

- Recall and use basic HTML tags.
- Explain the difference between HTML and CSS.
- Apply CSS properties to change the appearance of a webpage.
- Test your code and make improvements.
- Reflect on your learning and identify areas for further exploration.

PART 6: REFLECT AND SHARE

Return to the class Padlet and reflect on your learning.Padlet: https://padlet.com/ishitab2/my-harmonious-padlet-s024gpdqctcgy7tf68x2
